SALES ENGINEERING

Engineering Our Customers Success Since 1974

INNOVATIVE - MODULAR - RELIABLE

Raw materials handling systems for the plastics industry

DRYING

- Desiccant bed technology
- Superior energy savings
- Over-drying protection
- Central & portable versions
- Integrated controls

CONVEYING

- Automated material selection & delivery
- Noise reduced conveying technology
- Individual conveying speed control
- Modular vacuum receiver design
- Central & stand-alone versions
- Integrated controls
- Material tracking

DOSING & MIXING

- Batch blenders
- Integrated controls
- Loss-In-Weight Feeding Systems
- Volumetric & Gravimetric versions
- Small to High throughput applications

INTEGRATED SOLUTIONS

- Storage (Silos, Surge bins, Big-Bags)
- Project Management & Training
- 24/7 Service & Support
- Controls integration
- Mezzanines
- Installation

BARRY
SALES ENGINEERING

Brands that Perform

Barry Sales Engineering represents the most reliable and sought-after brands in the industry. We aren't pigeon-holed to come up with solutions that fit within a couple of manufacturer offerings. We truly solve your operations' challenges by utilizing products that can be mixed and matched for a custom solution that will improve efficiencies, safety and profitability.

Injection Molding Solutions

from SMARTFLOW®

Save Time and Energy

- Maximize cooling water efficiency
- Flowmeters and Regulators balance and optimize cooling circuits.
- Manifolds organize process cooling water.
- Free on-line tools calculate Turbulent Flow in support of Scientific Cooling™.

Change Molds Faster

- Implement SMED in your tool changes
- FasTie® snaps together ejector systems.
- SWAP® Valves quickly clear cooling lines.
- Mold-mounted Duoflow® manifolds simplify water hook-ups.

Protect Valuable Tooling

- In-Mold Sensors help prevent mold crash
- Thinswitch® verifies ejector plate position.
- Smartlock® retains and confirms slide location.
- Versaswitch™ provides core pull switching.

Solutions that Simply Work!

Quality Customer Service and Products Since 1974

Welcome to **Barry Sales Engineering**. We are a total, turnkey solutions provider for Plastic Processors and all segments of manufacturing in North America.

The **Barry Sales** product mix is comprised of Process Equipment for Plastics Processes, Controls and Factory Automation products that include Robotics, PID, machine safety, process heating, SCADA systems, position and advanced sensors for pressure, flow, temperature, bar code, vision and color. We can package and support the commissioning of any process or machine control issue and deliver a cost-effective, efficient solution.

The Barry advantage lies in our technical skills, product knowledge and ability to problem solve an incredible range of manufacturing challenges. We are a one-stop shop with extraordinary customer support. We understand the manufacturing process and offer an incredibly talented staff and a reputation for excellence for our valued customers to lean on.

Simply put, **Barry Sales Engineering** wants to improve your manufacturing process. We aim to earn your trust and serve as a lifelong partner in your success.

Factory Automation

- Barcode Systems
- Connectivity
- Data Collection
- HMIs / PLCs
- Machine Safety
- Motion Control
- Process Heat
- Process Instrumentation
- Robotic Automation
- Sensor Technology
- VFDs Motor Control
- Vision Inspection

Plastics Processing

- Blending & Dosing
- Blow Molding
- Cooling & Heating Systems
- Extrusion
- Granulation / Recycling
- Injection Molding
- Materials Handling & Drying
- Mold & Tooling
- Parts Handling
- Plastics Assembly Automation
- Process Control & Monitoring
- Robotics

RELIABILITY
Standard on all MAC products

MAC
AUTOMATION CONCEPTS

Automatic Fill Systems

MAC Automation currently offers 5 standardized types of automatic container indexing and loading systems. The styles include: In-line, Parallel, MAC-Stack (over/under), L-Shaped, and Rotary Indexing Table.

Aluminum, Steel & Stainless Steel Conveyors

MAC's precision machined trapezoidal crowned steel pulleys provides improved belt tracking and less contamination compared to aluminum pulleys.

Rotary Index Tables For bags, boxes & Totes

Rotary Accumulation Tables

Part Sorting Equipment

Screw type Part/Runner separation system and free stand alone for under the injection molding machine.

Inspection Tables

Aluminum, Steel or Stainless Steel Construction

PROVIDING PARTS HANDLING SOLUTIONS SINCE 1980

BARRY
SALES ENGINEERING

Barry Sales Engineering is your one-stop solution to integrating quality equipment and optimizing systems to ensure your operation is producing results in an efficient and economical manner.

Our customers include OEMs, end-users, integrators and contractors within every market segment. Our product focus is comprised of lines that allow us to provide a turnkey solution to our customers.

The **Barry Sales** support team is eager to respond to each inquiry, no matter how large or small the issue may be. We also provide the analysis needed when deciding whether to repair or replace equipment. We are an advocate for your bottom line and what makes the best for your specific needs.

Repair or Replace?

Facing that dreaded decision? Let **Barry Sales Engineering** provide you with the most cost-effective solution to fit your needs!

- We provide Repair or Replacement estimates
- All repairs are performed by highly trained, certified and experienced technicians
